Open to International Relocation

Professional Summary

Senior QA Automation Engineer with 5+ years of experience delivering quality across enterprise SaaS, FinTech, Web3 and business applications. Specializing in Playwright, TypeScript, end-to-end automation, API testing and CI/CD, with additional experience in Cypress, Selenium and manual testing. Experienced in building maintainable automation frameworks, improving regression coverage, validating complex business workflows and collaborating with distributed engineering teams. International client experience includes Chia Network and TestEquity, with additional experience in requirements analysis, sprint coordination and QA team coordination. Open to international relocation.

Technical Skills

Automation: Playwright, Cypress, Selenium, Page Object Model (POM), BDD/Cucumber

Languages: TypeScript, JavaScript, Python, SQL

Testing: Functional, Regression, End-to-End, API, Integration, Exploratory, Smoke, UAT

API & Test Tools: Postman, REST APIs, Jira, TestRail, Zephyr Scale, Linear

CI/CD & DevOps: Git, GitHub Actions, Jenkins, CI/CD Pipelines

Databases: PostgreSQL, MySQL, MongoDB, Supabase

Methodologies: Agile, Scrum, Requirements Gathering, Sprint Planning, Backlog Refinement

Professional Experience

Software QA Analyst

Sep 2025–Present

Solus USA — Client: TestEquity

- Lead end-to-end QA for enterprise software across manual, automated and API testing, working directly with distributed product and engineering teams.
- Design, develop and maintain Playwright automation using TypeScript for critical business workflows and regression coverage.
- Integrate automated testing into CI/CD pipelines and investigate failures across application, test and environment layers.
- Analyze business requirements and user stories, identify test scenarios and translate requirements into actionable test coverage.
- Support sprint planning, backlog refinement, ticket creation, prioritization and sprint execution across QA and engineering workflows.
- Collaborate with developers, product managers and client stakeholders to investigate defects, clarify expected behavior and validate fixes.

SQA Engineer

Feb 2025–Mar 2026

Silverthread Labs — Client: Chia Network / Permuto Capital

- Delivered full-scope QA for a blockchain-based FinTech platform, validating complex financial workflows, Web3 functionality and application data integrity.
- Designed and executed end-to-end test coverage across functional, regression, exploratory and API testing.
- Built and maintained Playwright automation for critical user journeys and repeatable regression validation.
- Validated Web3-related workflows involving wallets, transactions, APIs and application data.
- Investigated defects across frontend, API and data layers and worked closely with distributed engineering teams to reproduce and validate fixes.
- Contributed to release validation by identifying defects and coverage gaps early in the development lifecycle.

Senior QA Engineer

Oct 2024–Jan 2025

New Web Order

- Led QA activities across software projects while coordinating a team of 5 QA Engineers and 2 Junior QA Testers.
- Designed and maintained Cypress and BDD/Cucumber automation suites for critical application workflows and regression coverage.

- Developed API test coverage and integrated automated tests into GitHub Actions CI pipelines.
- Planned and executed functional, regression, exploratory and end-to-end testing across major releases.
- Coordinated defect triage, test execution and release validation between QA, development and product teams.
- Acted as Scrum Master, facilitating sprint ceremonies and supporting team coordination and delivery tracking.

Quality Assurance Engineer

Oct 2023–Oct 2024

New Web Order

- Performed manual and automated QA across web applications and business-critical workflows.
- Built Cypress and BDD/Cucumber automation suites for repeatable functional and regression testing.
- Developed API tests and supported integration of automated testing into GitHub Actions CI workflows.
- Executed end-to-end testing, investigated defects and collaborated with developers to validate fixes.

Quality Assurance Automation Engineer

Jul 2021–Sep 2023

Ewarenet

- Spearheaded the transition from manual testing to scalable automation using Playwright, Cypress and Selenium.
- Built and maintained reusable automation using Page Object Model (POM) and modular testing architecture.
- Tested CRM, HRM, ecommerce and internal productivity applications across functional and end-to-end workflows.
- Designed and executed functional, regression, exploratory and API testing throughout the software development lifecycle.
- Integrated automated test suites into CI/CD pipelines to support repeatable regression testing and QA delivery.
- Collaborated closely with developers and product stakeholders to reproduce defects, validate fixes and improve application quality.

Selected Projects

QA Central Dashboard / TestLens

- Built a centralized dashboard for monitoring Playwright automation results across multiple repositories and projects.
- Integrated GitHub Actions with Supabase/PostgreSQL to collect, store and visualize automated test results.
- Implemented repository health monitoring, execution history and automated analysis of test results.

Playwright Automation Framework

- Developed a reusable Playwright and TypeScript framework using Page Object Model architecture for maintainable end-to-end automation.
- Integrated automated execution with CI/CD workflows, reporting and regression testing processes.

Education

B.S. Computer Science

2017–2021

National University of Sciences and Technology (NUST)

Professional Development

Playwright: Automated Testing & AI Workflows
